

JOSH PETER PARDOSI

Batam, Kepulauan Riau | itsjoshpeter@gmail.com | +62 811-2222-5245 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (GPA 3.68/4.00) with hands-on experience across the full data analysis workflow — data cleaning, exploratory data analysis (EDA), SQL querying, and dashboard storytelling. Proficient in Python, PostgreSQL, and Tableau, with a track record of turning messy, real-world datasets into decision-ready insights. Currently seeking a **Data Analyst internship** to deliver measurable, data-driven business impact.

EDUCATION

University of Sumatera Utara — Bachelor of Computer Science Medan, North Sumatera · 2023–2027

- Cumulative GPA: 3.68 / 4.00
- Relevant Coursework: Statistics & Probability, Calculus, Linear Algebra, Database Systems

PROJECTS & PORTFOLIO

Customer Orders Data Cleaning & Standardization — Python Python · Pandas

github.com/JoshPardosi-231401031/Python-Data-Cleaning-Project

- Built a reproducible Pandas cleaning pipeline in Google Colab that standardized 15+ inconsistent country entries into one clean category set and parsed 100% of mixed-format dates into datetime features (year, month, day).
- Enforced logical integrity checks to flag zero/negative order quantities, producing an accurate, analysis-ready dataset for downstream reporting.

Restaurant Orders & Menu Performance — SQL PostgreSQL · DBeaver

github.com/JoshPardosi-231401031/restaurant-orders-sql

- Analyzed 5,370 orders (12,234 items) across a 32-item menu using multi-table SQL (JOINS, aggregations, GROUP BY, subqueries) in PostgreSQL.
- Found that Italian dishes drive the highest-spend orders (up to \$192.15) while American items are the most-ordered category — an actionable insight for menu and pricing strategy.

Global Retail Expansion & Revenue Analysis — Tableau Tableau

[GitHub Repo](#) · [Live Tableau Dashboard](#)

- Built an interactive Tableau dashboard for CEO/CMO decision-making — forecasted 2011 revenue seasonality (Q4 peak), ranked the top 10 non-UK revenue countries, and surfaced the top 10 VIP customers for targeted retention.
- Performed data due diligence by filtering out returns (negative quantities) and invalid pricing so all revenue metrics reflect genuine, completed transactions.

TRAINING & CERTIFICATION

Data Scientist — Coding Camp by DBS Foundation × Dicoding Indonesia Feb – Jul 2026

- Completed full data science workflows — data cleaning, exploratory data analysis (EDA), and foundational machine learning in Python — applied to real-world, multinational-style case studies.
- Practiced best practices in reproducible analysis and data documentation.

DataCamp: Data Science, Data Analytics, Python, SQL & Excel Fundamentals · Introduction to SQL · Intermediate SQL · Tableau Fundamentals

PROFESSIONAL EXPERIENCE

Mathematics Tutor — Freelance Sep 2023 – Present

- Mentored 20+ students over 2+ years in Calculus, Statistics, Algebra, and Probability, consistently breaking complex quantitative problems into clear, understandable steps.
- Designed personalized learning approaches per student, demonstrating strong analytical thinking and communication.
- Independently delivered UTBK exam-prep sessions at Del High School and Yayasan Sopasurung High School, two of North Sumatera's most academically rigorous boarding schools.

SKILLS & INTERESTS

Tools: Python, PostgreSQL, Microsoft Excel, DBeaver, Tableau Public, GitHub

Data & Analytics: Data Cleaning, Exploratory Data Analysis (EDA), SQL Querying, Data Visualization, Data Storytelling

Soft Skills: Analytical Thinking, Problem Solving, Communication, Adaptability

Career Interest: Data Analyst

Languages: English (Fluent), Indonesian (Native)
